Medical Aid

Monthly medicine support

■■■ ■■■■■■■ ■■■■■■■ — ■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■

Live demo: https://maid-beta.vercel.app/demo

For people

No account. Three public doors.

1. Submit — about 3–5 minutes. The form saves as they type.
2. Status — track by request number. Names stay masked until they verify.
3. Profile — company, employee ID, and phone. Renew for 2027. Say if this month helped.

For staff

One numbered path. Counts show what is waiting.

1 Queue — new requests. Process matches, enrolls, and drafts a claim.
2 Claims — review the draft, then submit the amounts.
3 Pharmacy — available at EVA or not. Download the CSV for each route.
4 Programs — the chronic file: meds, care-line, and continuity.
5 Refills — this month’s cycle. Approve, then dispense.
6 Impact — who was reached, what was delivered, and whether people said it helped.

What the board shows

People reached, and how long they stay. This month’s delivery against last month. How many said the support helped. Each organization, flagged when it needs a look.

Organizations see only their own people. Register at /org/register. Staff sign in with Google.
